HOUSE RULES & INFO 2023

The use of all the above material is included.

The PA system is only operated by our in-house technician.

Damage to material caused by misuse will be charged.

If you want to make audio recordings, we ask you to bring your own laptop with the necessary software or at least your own external hard drive.

We are not responsible for the delivery of recordings and material afterwards.

Walter is not responsible for theft of or damage to technical equipment and instruments.

There are two available circuits at 20A for the outlets.

The lighting is on two 16A circuits, both of which are partially in use.

Our light set is fixed, luminaires can be directed but not hung in other places.

If you want to connect heavy consumers, please report this in advance and check it on site with the technician.

Smoke machines and hazers are not allowed.

Equipment must be unloaded from the street. It is not possible to enter by car, nor can we reserve parking spots.

Parking is at your own expense according to local regulations.

There is an elevator to take material to level +2 (concert hall).

Maximum opening of the elevator entrance is 90x200.

We do not have backstage facilities.

Wifi is provided in the foyer and common areas, not in the concert hall.

When planning rehearsals, recordings and residencies, we take into account the working hours of our technical crew. Please respect the agreements made in this regard.

On Monday morning our cleaning service is in the house. Take this into account in your planning.

Werkplaats Walter is a shared space with shared responsibility. As a user, we ask you to take responsibility for our place.

Eating and drinking in the hall is not allowed.

The foyer invites for a coffee break or a lunch. We only do bar shifts for public events.

Use and enjoy the spaces but don't leave traces.

Respect everybody working in Walter, as they will respect you.

We hope you'll have a great time working, creating and experimenting at Walter!
